Members of the Mohawk class of 1968, your educational program has given you the rules and tools for what you want to be and what you can be. What you will be depends upon your wise use of your education.

You are invited and always welcome to return to Mohawk. Your school will continue to offer services to you whenever requested.

Best wishes for success and happiness to the class of '68.

James W. Smith

It has been a pleasure for me to work very closely with the class of '68. During your high school years you have accomplished many outstanding achievements. As you know most goals are reached because that person had a plan. Your class has the potential to continue achieving but you must plan constantly and keep raising your goals. Don't let the best that you have done be the standard for the rest of your life.

The staff of Mohawk High School wishes all of you success in your future endeavors.

At the tea table

Several activities were enjoyed during the year by the members of the Future Teachers of America. These activities included the Mixer in the fall to acquaint the prospective members with the old members, the annual Chocolate Hour during which the alumni returned to visit, the student teaching day which was a great success, and the Silver Tea given in the spring.

The money received from club dues and donations given at the Silver Tea enabled the club to give small but helpful grants of money to the seniors who are entering the education field.

Yankee In Court

The Senior Class presented the new version of one of the most humorous books written. The cast performed well in developing striking contrasts between the old and the new.

The Yankee from Connecticut is a young engineer just out of college and anxious to try his hand at every kind of mechanical device. He is knocked out cold by one of his experiments and wakes up to find himself in the Court of King Arthur.

Coach Dorman

This season was previewed by the three summer scrimmages before the season opener. In these scrimmages the team showed an ability to move the ball, an inability to score, and an ability to play fair defense. At the end of the season the record was 3 wins, 5 losses and 1 tie. A total of 19 points cost three losses and the tie. However, the difference between winning and losing can only be measured by the difference in desire and effort by the opposing players. In the games that were lost the opposing teams were made up of players who worked harder, wanted it more, and cooperated to get the victory.

Football is a sport which demands many sacrifices from a boy if he desires to be a football player. If a boy does not wish to make the necessary sacrifices he is merely a player of football and not a football player. On behalf of the coaching staff I wish to express my gratitude for the opportunity of working with the few football players on this years squad.

The basketball season of 1967-68 was a different one to understand. Our boys had the potential to beat any team in the conference as was proven against league co-champ, Elgin. We just couldn't get all of our assets working together on the same night. The assets that have to be going for you consistently are defense, passing, shooting and being able to co-ordinate the offense as a single unit. When a team does these consistently, they will be a consistent winner. The athletes of Mohawk will have to understand that playing a sport just for the sake of playing will not make this school a winner. If that were the only purpose of the game, then I doubt very much if there would be much gained in sports. When the boys of Mohawk have learned to play a sport well, they have acquired some valuable traits that will carry over into life. After all, there is not much difference in the character traits we must possess to succeed in different walks of life. The principles you must follow in sports are principles you must follow in any worthwhile undertaking.
